**RCRA EMPTY CONTAINER CERTIFICATION**

I hereby certify to the best of my knowledge, the containers that once held \_\_\_\_\_, represented by Waste Profile No. \_\_\_\_\_, were never used to store PCB's (pursuant to 40CFR Parts 261 and 761 and meet the following definition of "EMPTY" [pursuant to 40CFR 261.7(b)(1)(2)(3)]:

1. A container that has held a waste or product, except a waste or product that is a compressed gas of that is identified as an acute hazardous waste listed in 261.31, 261.32, 261.33(e), of 40CFR 261, is "EMPTY" if:
    - a. All waste has been removed using the practices commonly employed to remove materials from that type container (i.e. pouring, pumping, and aspirating), AND
    - b. No more than one inch (2.5 centimeters) of residue remains on the bottom of the container, OR
    - c. I. No more than 3 percent by weight of the total capacity of the container remains in the container if the container is  $\leq$  110 gallons in size, or  
  
II. No more than 0.3 percent by weight of the total capacity of the container remains in the container if the container is  $>$  110 gallons in size.
  2. A container that has held a waste or product that is a compressed gas is empty when the container approaches atmospheric pressure.
  3. A container that has held acute hazardous waste listed in 261.31, 261.32, or 261.33(e) is empty if the container has been triple rinsed.
